Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 12, 26 and 27 have been renumbered 26, 27 and 28.

Claim Rejections - 35 USC § 112

Claims 16-28 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 16-28 depend from claims, which were canceled by the preliminary amendment.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 3745

Claim 15 is rejected under 35 U.S.C. § 102(b) as being clearly anticipated by any one of Levrai, Inoue et al, Ando et al, Endo, Japan 10230841 or Applicant's admitted prior art (fig 1).

Claim 15 is rejected under 35 U.S.C. § 102(e) as being clearly anticipated by Tobisawa.

The above references disclose all of the elements of claim 15, with the means for absorbing deformations of the reaction disc being considered equivalents to the disclosed means of the instant invention. One embodiment of the disclosed means is formed by spring loading two movable parts of the output member. One of ordinary skill in this art would recognize that doing the same that with the input member or a similar form with the output member (Applicant's admitted prior art) would be considered equivalent in this art.
